Navigating the Website Menu

On

Phones/Small Tablets

If you are not viewing this web page on a television, desktop, laptop, or larger portable tablet, the organization of the web page may be different on a smaller tablet or phone screen display.

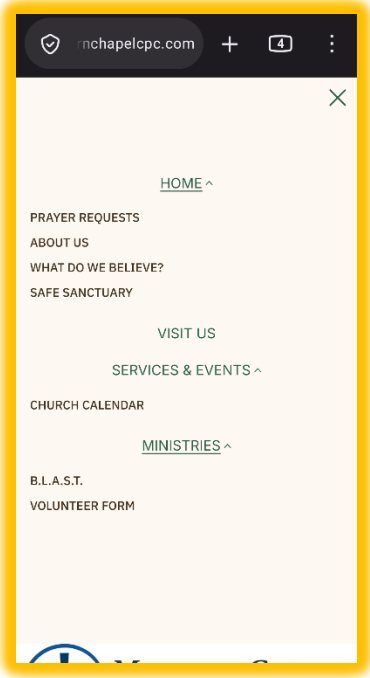

If you are viewing this website on a phone or small tablet, you may see three (3) horizontal lines on the top of the display (see highlighted (yellow) oval).

This is known in the digital world as a "hamburger menu" icon. Its function is to toggle a menu or navigation bar between being collapsed behind the button or displayed on the screen.

If you click on this icon with your finger or pen stylus, a detailed website menu will be displayed. (See image on your left).

You will see menu headers (e.g., "Home", "Visit Us", "Services & Events", and "Ministries"). You can click on these items, and a new web page will open. Some menu headers may have a ﹀ to the right of the menu name. If you click on this "arrow", a drop-down list of additional pages will be displayed for you to click on. If you wish to hide (collapse) these pages from the menu, just click on the ﹀ icon. (See image on your right).
